SUMMARY

Flanders has become part of the United Nations Institute for Training and Research with the launch of a local training centre, one of only 14 worldwide

Cifal Flanders

Flanders has marked the 70th anniversary of the United Nations with the launch of a new training centre, Cifal Flanders, which becomes part of an international network of 14 centres. The centres are part of Unitar, the United Nations Institute for Training and Research, based in Geneva.

Cifal (International Centre for the Training of Authorities and Leaders) has centres across the world, including Poland, Scotland, Brazil, South Africa, the US, Algeria and South Korea. The centres "provide innovative training throughout the world and serve as hubs for the exchange of knowledge amongst government officials, the private sector and civil society".

The Antwerp International Training Centre on Corporate Opportunities (Antwerp-ITCCO), launched in 2012, has now been recognised as a Cifal centre. "With this official recognition of Cifal Flanders, the city of Antwerp sees one of its sustainability partners grow into a fully-fledged UN training centre," commented city

SEPTEMBER 2015: UN APPROVES SUSTAINABLE DEVELOPMENT GOALS

United Nations A/RES/70/1

General Assembly Distr.: General 21 October 2015

Seventieth session
Agenda items 15 and 116

Resolution adopted by the General Assembly on 25 September 2015

[*without reference to a Main Committee* (A/70/L.1)]

70/1. Transforming our world: the 2030 Agenda for Sustainable Development

The General Assembly

Adopts the following outcome document of the United Nations summit for the adoption of the post-2015 development agenda:

Transforming our world: the 2030 Agenda for Sustainable Development

Preamble

This Agenda is a plan of action for people, planet and prosperity. It also seeks to strengthen universal peace in larger freedom. We recognize that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development.

All countries and all stakeholders, acting in collaborative partnership, will implement this plan. We are resolved to free the human race from the tyranny of poverty and want and to heal and secure our planet. We are determined to take the bold and transformative steps which are urgently needed to shift the world on to a sustainable and resilient path. As we embark on this collective journey, we pledge that no one will be left behind.

The 17 Sustainable Development Goals and 169 targets which we are announcing today demonstrate the scale and ambition of this new universal Agenda. They seek to build on the Millennium Development Goals and complete what they did not achieve. They seek to realize the human rights of all and to achieve gender equality and the empowerment of all women and girls. They are integrated and indivisible and balance the three dimensions of sustainable development: the economic, social and environmental.

The Goals and targets will stimulate action over the next 15 years in areas of critical importance for humanity and the planet.

ONE CAMPAIGN'S CONNECTIVITY DECLARATION: INTERNET ACCESS FOR ALL http://connecttheworld.one.org

The Connectivity Declaration reads:

> I believe: Internet access is essential for achieving humanity's #globalgoals.
>
> When people have access to the tools and knowledge of the Internet, they have access to opportunities that make life better for all of us.
>
> The Internet is critical to fighting injustice, sharing new ideas and helping entrepreneurs create more jobs. But right now, half the people on this planet don't have access, especially women and girls.
>
> The Internet belongs to everyone. It should be accessible by everyone.
>
> I call on leaders and innovators from all countries, industries and communities to work together as one to make universal internet access a reality by 2020, as promised in the new Global Goals.
>
> Let's #CONNECTTHEWORLD to achieve our #GLOBALGOALS.

The smart city model

A Smart City is a city well performing in 6 characteristics, built on the 'smart' combination of endowments and activities of self-decisive, independent and aware citizens.

1945: PREAMBLE TO THE CHARTER OF THE UNITED NATIONS

WE THE PEOPLES OF THE UNITED NATIONS,

determined

to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and

to reaffirm faith in fundamental human rights, in the dignity and worth of the human person, in the equal rights of men and women and of nations large and small, and

to establish conditions under which justice and respect for the obligations arising from treaties and other sources of international law can be maintained, and

to promote social progress and better standards of life in larger freedom, and for these ends

to practice tolerance and live together in peace with one another as good neighbours, and

to unite our strength to maintain international peace and security

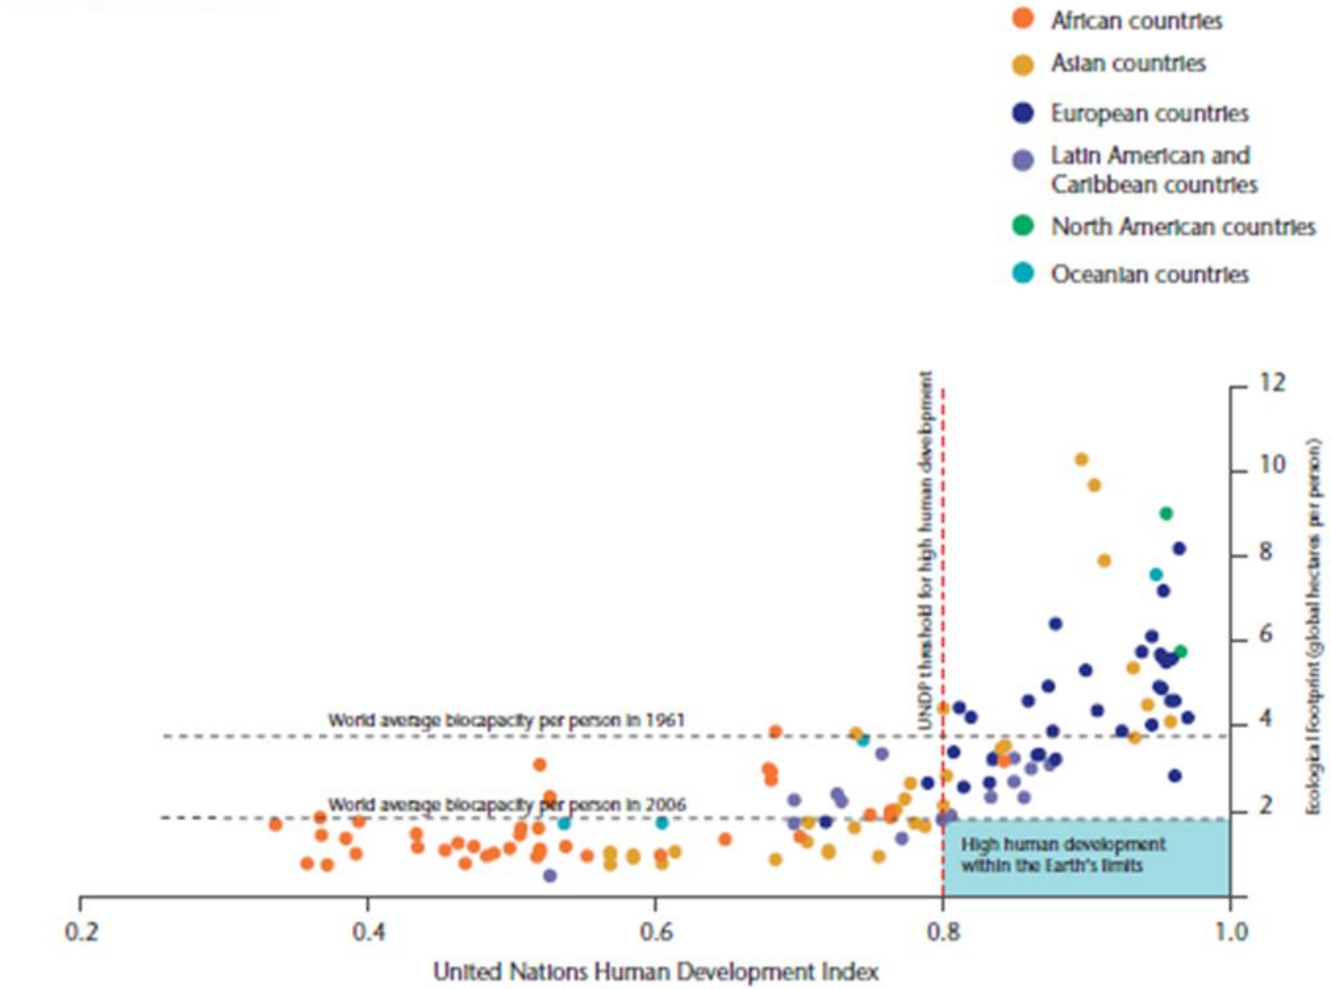
DUAL GOALS ON GLOBAL SCALE: HIGH HUMAN DEVELOPMENT & LOW ECOLOGICAL IMPACT

Box 1.1: Meeting the dual goals of sustainability – High human development and low ecological impact



© Global Footprint Network (2009). Data from Global Footprint Network National Footprint Accounts, 2009 Edition; UNDP Human Development Report, 2009

Background: Earth Summit, 1992

(Credit: UN)

The first global gathering on sustainability was the 1992 Earth Summit in Rio de Janeiro, Brazil.

"If you don't know how to fix it, please don't break it." – 12-yr old Canadian Severn Cullis-Suzuki at Earth Summit 1992

The Earth Summit – the United Nations Conference on Environment and Development (UNCED) June 3-14 – produced ***Agenda 21, a blueprint to rethink economic growth, to advance social equity and to ensure environmental protection***.

More than 178 Governments adopted: Agenda 21, the Rio Declaration on Environment and Development, and the Statement of Principles for the Sustainable Management of Forests.

Two important legally binding agreements were opened for signatures: the United Nations Framework Convention on Climate Change (UNFCCC), to reduce greenhouse gas emissions; and, the Convention on Biological Diversity, to conserve biodiversity. The Commission on Sustainable Development (CSD) was created to ensure effective follow-up to the Summit.

2000-2015: 8 MILLENNIUM DEVELOPMENT GOALS

PROGRESS 8 MILLENNIUM DEVELOPMENT GOALS (2000-2015)

Millennium Development Goals: 2015 Progress Chart

United Nations Member States gathered together at the start of the new millennium to shape a broad vision to fight poverty and combat numerous issues hampering development progress. The vision was translated into eight Millennium Development Goals and has remained the world's overarching development framework for the past 15 years. This framework, set to expire in 2015, includes time-bound goals, targets and indicators to monitor progress on extreme poverty and hunger, education, gender equality, child survival, health, environmental sustainability and global partnerships.

This chart presents the final assessment of progress towards selected key targets relating to each goal. The assessment provides two types of information: progress trends and levels of development, which are based on information available as of June 2015. The colour shows progress made towards the target and the text in the box shows the present level of development. For most indicators, 2015 projections are used to assess progress; for a few indicators that do not have 2015 data or projections, the latest available data of 2013 or 2014 are used.

2015 TIME FOR GLOBAL ACTION FOR PEOPLE AND PLANET

Goals and Targets	Africa		Asia				Oceania	Latin America and the Caribbean	Caucasus and Central Asia
	Northern	Sub-Saharan	Eastern	South-Eastern	Southern	Western

Open consultation on proposed global SDG Indicators coded as "green"

As agreed at the 2nd IAEG-SDGs meeting in Bangkok, an open consultation with IAEG-SDG Observers and other stakeholders took place on the proposed SDG Indicators that were coded as "green" ahead of the meeting. As indicated by the co-chairs of the IAEG-SDGs, additional comments on the indicators coded as "green" during the meeting could also be submitted. The consultation was open from Wednesday, **4 November 9 am EST to Saturday, 9 am 7 November EST** and is now closed to further comments.

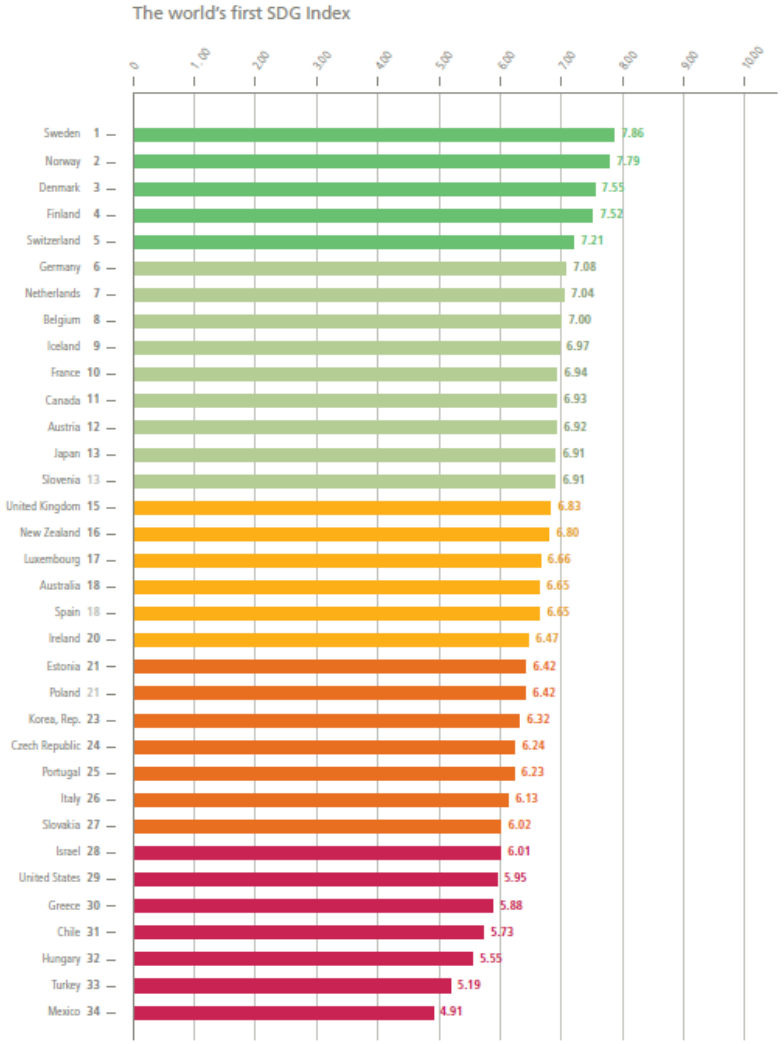
FIRST SDG INDEX OF 34 OECD COUNTRIES: BELGIUM AT PLACE 8



The SDG Index illustrates the overall performance of each OECD country based on the 17 goals and 34 indicators examined in the study. In sum, Sweden, Norway, Denmark, Finland, and Switzerland are best prepared to meet the SDGs and in a good position to foster sustainable development by 2030. However, even these countries are faced with particular challenges, as the country profiles in this study illustrate.

“Langzame steden”: gericht op burgers, milieu en duurzaamheid

De levenskwaliteit van de burgers verbeteren, dat is het kernconcept van een “slowcity”. Maar daarvoor moeten burgers, producenten en politici op dezelfde lijn staan. Via ecologische, lokale en op burgers gerichte initiatieven ontwikkelde onder andere het Waalse Opzullik zich als zo’n “langzame stad”.

ROXANE HOEDEMAKERS · 25 OKTOBER 2015

Slow city in the making

Gemaakt op vrijdag 14 augustus 2015 20:22

In het kader van 'Cultuurzomer Tongeren' is vanavond in het voormalige winkelpand 'Mani' (Kloosterstraat) de tentoonstelling ' Slow city in the making' van start gegaan. Met dit initiatief wil de Stad Tongeren, samen met Ricardo Belli, een podium geven aan de ontwerpers van de Maastricht Academy of Fine Arts (MAFAD) voor hun sieraad-,mode- en interieurdesign.
'Slow City, is een tentoonstelling waarbij designers niet alleen werk tonen, maar ter plekke in zogenaamde pop-up ateliers design creëren. De bezoeker van deze tentoonstelling ontmoet de maker en leert daardoor het verhaal achter het werk kennen.
Toerismeschepen Marc Hoogmartens verwelkomde de 35 aanwezigen: "Doel van dit project is laten zien hoe mooi het kunstambacht kan zijn en dat verbinden met de kwaliteiten van onze mooie stad. We willen als 'eerste stad' weer aanknopen bij de kunsten, het ambacht, het metier en daarmee de stad aantrekkelijker maken voor bewoners en cultuurtoeristen". Aansluitend gaf productvormgever Patrick Belli een uiteenzetting over design.

USEFUL INFORMATION

TERMS AND CONDITIONS

The 2015 World Smart City Awards winners

After a huge quantity of entries, the most pioneering initiatives have been chosen based on innovation, impact and feasibility.

CITY AWARD

Peterborough city council for a Living Smart and Circular Urban Laboratory

United Kingdom

Peterborough, one of the 4 UK Future City Demonstrators, aspires to become the UK Environment Capital and its first Circular City. Its smart city Programme Peterborough DNA runs since 2013 to implement its Growth, Innovation and Sustainability interlinked end-goals through bottom-up collaborations.

PROJECT AWARD

Smart City and Educational Equity in Shijiazhuang

China

Under the support of Hebei provincial government, **Hebei Digital Education Collaborative Innovation Center** promoted the modernization of education by collecting grass-roots teaching and learning micro-information, making education assessments based on big-data analysis and providing targeted help.

INNOVATIVE IDEA AWARD

Findeter for The Digital Diamond. Caribe & Santanderes

Colombia

An initiative for competitiveness & ecodevelopment in a complex region in Colombia, combining "Urban Intelligence" + "Digital Technology". Led by Findeter, Government Development Bank, and the governors of 10 departments. Conceptual and technological support of the Fundación Metrópoli and Microsoft.

Action Clusters

An **Action Cluster** is an assembly of partners committing to work on specific issues related to smart cities, by sharing the knowledge and expertise with their peers, giving added-value to their national and local experience and identifying gaps that need to be fulfilled at European level. Stakeholders wishing to get involved in one of the 6 Action Clusters set up so far were selected through an **"Invitation for Commitment" application process.**

This Invitation for Commitment, which closed on 15 June 2014, invited interested parties to join the EIP by stepping forward and supporting its objectives in any of the eleven focus areas identified in the Strategic Implementation Plan.

A commitment is an intention to provide a measurable and concrete engagement in support of one or more focus areas over the next year or a longer period of time, **linking energy, transport and ICT in the urban context**. 441 commitments were submitted by groups of stakeholders spanning the public and private sector out of which 370 were selected to build up the Action Cluster.

The 6 Action Clusters which have been set up so far are:

- Business models
- Citizen Focus
- Integrated Infrastructures & Processes (including Open Data)
- Policy & Regulations / Integrated Planning
- Sustainable Districts and Built Environment
- Sustainable Urban Transport

No new Invitation for Commitments is foreseen for early 2015 but it is possible to join an Action Cluster or an existing commitment. To do so please check out the list of commitments and contact us.

"Smart Cities & Sustainable Development":

Een uitdaging voor de overheid, een opportuniteit voor burgers en ondernemingen!

Steden en gemeenten staan vandaag op een kruispunt. Om aantrekkelijk en concurrerend te blijven, moeten zij slimme en duurzame oplossingen bedenken. Kortom, evolueren tot "Smart Cities"!

Wil u hierover meer weten of wil u slimme en duurzame projecten financieren? U vindt hierover de nodige informatie in ons dossier.

BELFIUS-AGORIA SMART CITY AWARD 2015

Met de **Smart City Award** beloont Belfius de creatiefste stad of gemeente met hun duurzame vernieuwing. Een vakjury heeft 10 inzendingen genomineerd die kunnen rekenen op **een mooie communicatiecampagne**, onder meer in **Knack** (zie www.knack.be/belfiussmartcity) en **Le Vif/L'Express**. Een unieke gelegenheid om de creativiteit van uw stad of gemeente in de schijnwerpers te zetten!

De stemming is afgelopen. Bedankt voor jullie massale deelname. De resultaten worden bekendgemaakt op 2 december tijdens de Belfius Smart City Award 2015 gala-avond.

Dagprogramma Agoria Smart Cities Forum: 2 december 2015 @ Brussels44Center

Programma en inschrijvingen via onderstaande link: www.smartcitiesforum.be

AGORIA SMART CITIES

Word lid van het Agoria Smart Cities-project en laat uw stem horen bij steden en gemeenten

Sinds 2011 zet Agoria het smart cities-thema op de kaart bij Belgische steden en regionale overheden. Meer dan 500 stakeholders maken al deel uit van de Agoria Smart Cities Community. De fase van Belgische steden, gemeenten en overheden sensibiliseren en informeren, is voorbij. Onze doelgroep is nu vertrouwd met de term smart cities, is op de hoogte van buitenlandse initiatieven of participeert in regionale en Europese initiatieven. De fase die nu aanbreekt, is die van implementatie. Hoe begint een stad of gemeente best aan de ontwikkeling van een smart city, zeker in tijden van budgettaire beperkingen? Agoria zal samen met zijn leden van de Smart Cities Community een kader aanbieden om Belgische steden en gemeenten te helpen "slimmer" worden.

Wat biedt het Agoria Smart Cities-project in 2015?

- Lancering van de praktische gids 'Smart City: hoe begin ik eraan?'. In deze gids krijgen steden, gemeenten en overheden tal van praktische voorbeelden aangereikt door Agoria-leden. U ontvangt binnenkort via Agoria Online een uitnodiging om aan de voorbereidende werkgroepen deel te nemen.
- Het grote jaarlijkse Smart Cities Forum en de uitreiking van de Smart Cities Award op 10 september 2015.
- Aankondiging van de Agoria Smart Cities Award in het voorjaar.
- Concrete lobby-activiteiten bij steden, gemeenten en regionale overheden.
- Workshops met steden en gemeenten.
- Organisatie van seminaries.
- Ondersteuning van buitenlandse missies, in het bijzonder twee missies georganiseerd door AWEX Wallonie naar 4 Franse steden en een B2B-activiteit rond initiatieven in de UK.
- Aantrekken van sponsors en opvolgen van financiering voor smart cities.
- Verdere uitrol van het smart cities-netwerk.

Urban mobility – How ARS T&TT is driving innovation in a Fragmented and rigid industry

Sustainable Cities

The evolution towards a green and sustainable economy provides opportunities for new investments to replace old infrastructure in developed countries. There is indeed a strong demand for services, utilities and new infrastructure with a sustainable community impact. In that framework, Gimv can fully deploy its wide-ranging expertise in infrastructure and technology/ cleantech.

Gimv will facilitate the development of companies in the energy, utilities and other highly regulated markets which have a strong infrastructure component. Investments in physical and digital infrastructure with community impact and related operations and services are also targeted.

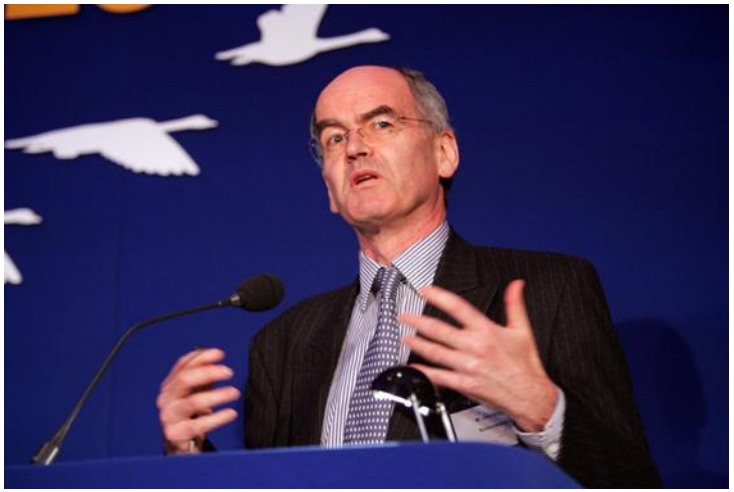
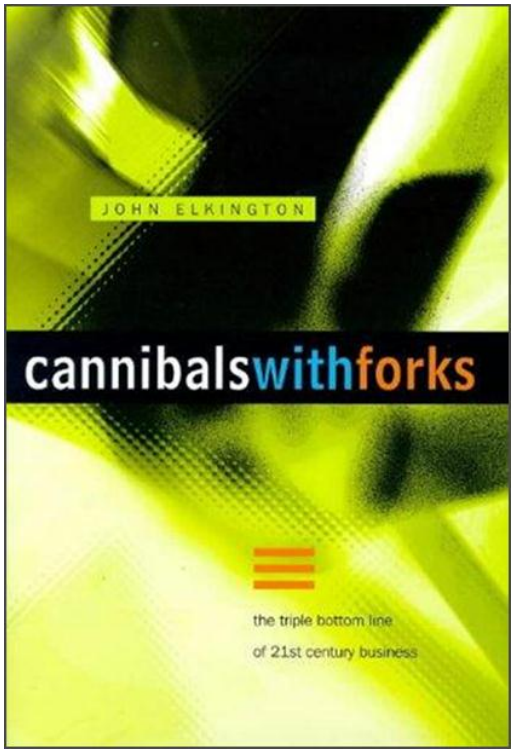
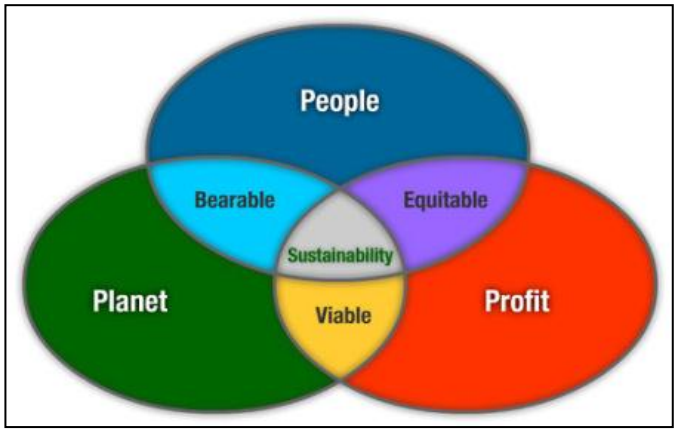
& Social Economy
& Future Proof Business Models

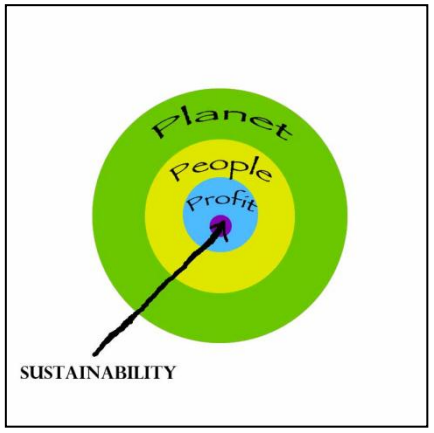
2. Smart & Sustainble Cities

John ELKINGTON (UK)
1997: *Triple Bottom Line*









2000: UN GLOBAL COMPACT

The Ten Principles of the UN Global Compact

The Global Compact's ten principles are derived from:
The Universal Declaration of Human Rights;
The International Labour Organization's Declaration on Fundamental Principles and Rights at Work;
The Rio Declaration on Environment and Development; and
The United Nations Convention Against Corruption.

The Global Compact asks companies to embrace, support and enact, within their sphere of influence, a set of core principles in the areas of human rights, labour standards, the environment, and anti-corruption:

Human Rights

1 Businesses should support and respect the protection of internationally proclaimed human rights, and
2 make sure that they are not complicit in human rights abuses.

Labour

3 Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining,
4 the elimination of all forms of forced and compulsory labour,
5 the effective abolition of child labour, and
6 the elimination of discrimination in respect of employment and occupation.

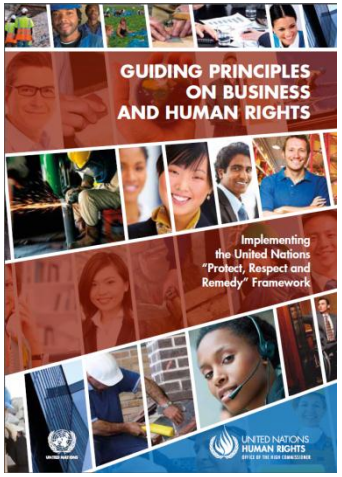
Environment

7 Businesses should support a precautionary approach to environmental challenges,
8 undertake initiatives to promote greater environmental responsibility, and
9 encourage the development and diffusion of environmentally friendly technologies.

Anti-Corruption

10 Businesses should work against corruption in all its forms, including extortion and bribery.

2011: UN 'PROTECT, RESPECT AND REMEDY' FRAMEWORK (UNGP)



UN Special Representative John Ruggie proposed a framework on business & human rights to the UN Human Rights Council in June 2008, resting on three pillars:

1. the state duty to protect against human rights abuses by third parties, including business;

2. the corporate responsibility to respect human rights; and

3. greater access by victims to effective remedy, both judicial and non-judicial.

NEWS RELEASE

UNITED NATIONS HUMAN RIGHTS
OFFICE OF THE HIGH COMMISSIONER

16 June 2011

New Guiding Principles on Business and human rights endorsed by the UN Human Rights Council

GENEVA – In an unprecedented step, the United Nations Human Rights Council has endorsed a new set of Guiding Principles for Business and Human Rights* designed to provide -for the first time- a global standard for preventing and addressing the risk of adverse impacts on human rights linked to business activity.

"The Council's endorsement establishes the Guiding Principles as the authoritative global reference point for business and human rights," said John Ruggie, the Secretary-General's Special Representative for Business and Human Rights. "They will also provide civil society, investors and others the tools to measure real progress in the daily lives of people."

The Guiding Principles are the product of six years of research led by Professor Ruggie from Harvard University, involving governments, companies, business associations, civil society, affected individuals and groups, investors and others around the world. They are based on 47 consultations and site visits in more than 20 countries; an online consultation that attracted thousands of visitors from 120 countries; and voluminous research and submissions from experts from all over the world.

The new standards outline how States and businesses should implement the UN "Protect, Respect and Remedy" Framework in order to better manage business and human rights challenges.

Under the 'State Duty to Protect,' the Guiding Principles recommend how governments should provide greater clarity of expectations and consistency of rule for business in relation to human rights. The 'Corporate Responsibility to Respect' principles provide a blueprint for companies on how to know and show that they are respecting human rights. The 'Access to Remedy' principles focus on ensuring that where people are harmed by business activities, there is both adequate accountability and effective redress, judicial and non-judicial.

In giving its endorsement, the Human Rights Council commended Professor Ruggie for developing the UN "Protect, Respect and Remedy" Framework, and recognized the role of the Guiding Principles in providing comprehensive recommendations for its implementation.

A SHARED IMPERATIVE

Business, government and civil society have a shared imperative to achieve the SDGs, and all have an important role to play. There are a number of benefits of engaging business in this collective effort, and benefits to business from getting engaged.

Benefits of Engaging Business in the SDGs

1. Harnessing business' core role in generating growth, productivity and jobs—all core drivers for progress.
2. Accessing private sector innovation around technologies, products, services, processes and business models.
3. Creating opportunities to achieve scale by harnessing businesses' knowledge of designing business models to meet specific customer needs in a scalable way.
4. Leveraging public sector and aid investments with corporate philanthropic, social or commercial investment.
5. Accessing complementary know-how and skills.
6. Building alliances to promote responsible social and environmental good practices, as well as spreading broader values and norms such as protecting and respecting human rights, promoting good governance and accountability, and increasing inclusion and equality.

Benefits to Business of Engaging in the SDGs

1. Securing the long-term success of business by improving the broader enabling environment and ecosystems in which business operates.
2. Identifying and managing material risks and costs.
3. Building reputation, strategic market positioning and safeguarding a licence to operate.
4. Strengthening relationships with employees, customers and other stakeholders.
5. Creating or accessing new markets. Technology, product, service and business model innovation that contributes to the SDGs also offers opportunities to reach new growth markets and strengthen competitiveness.
6. Aligning business action with the vision of the company's leadership and expectations of its employees, customers or clients.

France Declares All New Rooftops Must Be Topped With Plants Or Solar Panels

Apr 8, 2015 362697

A new law recently passed in France mandates that all new buildings that are built in commercial zones in France must be partially covered in either plants or solar panels.

Green roofs, as they are called, have an isolating effect which helps to reduce the amount of energy needed to heat a building during the winter or cool it in the summer. They are capable of retaining rainwater and reducing problems with runoff, and also offer birds a place to call home in the urban jungle.

CIFAL FLANDERS: ROADMAP 'SDGs COMPANY'

PRIORITY SDGs for Indaver personnel																
PRIORITY subgoals for Indaver personnel							7.2 By 2030, increase substantially the share of renewable energy in the global energy mix. 7.3 By 2030, double the global rate of improvement in energy efficiency.	8.8 Protect labour rights and promote safe and secure working environments for all workers, including migrant workers and those in precarious employment.	9.1 Develop quality, reliable, sustainable and resilient infrastructure, economic development and human well-being.		11.6 By 2030, reduce the adverse per capita environmental impact of cities, including by paying special attention to air quality and municipal and other waste management.	12.4 By 2020, achieve the environmentally sound management of chemicals and all wastes throughout their life cycle.	13.3 Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning.				17.7 Promote the development, transfer, dissemination and diffusion of environmentally sound technologies to developing countries on favourable terms, including on concessional and preferential terms, as mutually agreed
Objectives Indaver								Level 4: Protect stakeholders against risks of the management of hazardous waste	Level 2: Decrease the total environmental impact to air, water and ground of Indaver's treatment installations			Level 3: Move toward the circular economy by preventing waste and turning waste into a resource	Level 1: Reduce of the CO2 carbon footprint of Indaver's waste management activities			
UNEP - ISWA Outlook	W4: reduce, reuse, recycle	W5: Halve per capita global food waste at the retail and consumer levels	W1: Access for all to adequate, safe and affordable solid waste collection services. W2: Stop uncontrolled dumping, open burning.			W2: Stop uncontrolled dumping, open burning.	W3: Achieve sustainable and environmentally sound management of all waste, particularly hazardous waste	W4: reduce, reuse, recycle	W4: reduce, reuse, recycle		W1: Access for all to adequate, safe and affordable solid waste collection services. W2: Stop uncontrolled dumping, open burning.	W2: Stop uncontrolled dumping, open burning. W3: Achieve sustainable and environmentally sound management of all waste, particularly hazardous waste W4: reduce, reuse, recycle W5: Halve per capita global food waste at the retail and consumer levels	W3: Achieve sustainable and environmentally sound management of all waste, particularly hazardous waste	W2: Stop uncontrolled dumping, open burning.	W2: Stop uncontrolled dumping, open burning.		
UN Texts			3.9 by 2030 substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water, and soil pollution and contamination			6.3 by 2030, improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals.					11.6 By 2030, reduce the adverse per capita environmental impact of cities, including by paying special attention to air quality and municipal and other waste management.	12.4 By 2020, achieve the environmentally sound management of chemicals and all wastes throughout their life cycle. 12.5 By 2030, substantially reduce waste generation through prevention, reduction, recycling, and reuse		14.1 By 2025, prevent and significantly reduce marine pollution of all kinds, in particular from land-based activities, including marine debris and nutrient pollution

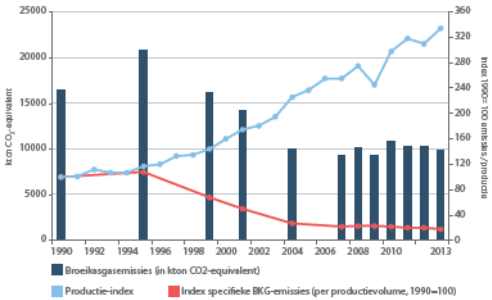
BKG emissies

Uitstoot broeikasgassen per productvolume met 80% gedaald

Broeikasgasemissies 1990-2013



- Broeikasgasemissies zijn per productvolume[1] **met 80% verminderd sinds 1990.** Deze scherpe daling werd onder meer bereikt dankzij drastische investeringen in N_2O emissiereductiemaatregelen en de vervanging van gefluoreerde gassen. Verdere emissiereducties werden gerealiseerd door continue energie-efficiëntieverbetering en de overschakeling naar aardgas.
- De belangrijkste broeikasgassen die door de chemische industrie en life sciences worden uitgestoot, zijn **koolstofdioxide (CO_2), lachgas (N_2O) en gefluoreerde gassen (PFK's, HFK's).** Deze statistieken houden geen rekening met de **indirecte CO_2 emissies** verbonden aan het gebruik van elektriciteit, want deze emissies worden traditioneel toegewezen aan de elektriciteitssector.
